Attached is a recommendation with suggested activities to be evaluated based on the study board's adopted criteria for evaluation practice.

Appendix:

- Suggestion for activities to be evaluated

Punkt 6: Method course for SØK

Beslutning

Approved for SØK students.

The study board would have liked it to be offered for the BAL and VL students as well.

The study board had questions regarding the course relative to the RUC GAI rules. The course is mentioning that participants are required to purchase a paid subscription to Claude and ChatGPT Pro, however Microsoft copilot is the one being used at RUC formally. The study board recommend that students should be able to use the copilot license that RUC offers. Perhaps even the ChatGPT Plus is enough. This is a cheaper version for the students to ensure the course is not excluding students.

The study board would like all VIP to have a course similar to this to improve VIP GAI knowledge as well.

The study board think the course is great to have for ISE students in general and would even like to see it at the BA level.

Recommendation:

The study board is asked to decide if SØK students should be able to take the method course PF is offering.

See the appendix for a description of the course.

Appendix:

Punkt 7: Course offer changes F27

Beslutning

The study board took note of the orientation. The study board emphasised the need to look into study progression between courses. It should be possible to put mandatory prerequisites on courses that are advanced in their field, such as the Frontier Econometric Methods for Applied Economics.

Recommendation

It is recommended that the study board notices the decisions shown in the appendix concerning three courses offered in F27.

Background

At ISE we have two new MA electives for F27. The Heads of Studies have agreed to which programmes they are offered other than the programme offering it. Not all wishes have come true, but almost all.

For the course Discourse Analysis, it was agreed to offer it to English programmes only (except BAL who does not want it) as there is a similar course in Danish.

Punkt 8: Intake

Beslutning

The study board noted that SØK has increased in size, which was pleasing news. As expected BAL has decreased due to only taking in legal claim students. VL has decreased more than what was hoped for. However, the exact numbers are not to tell until September 1st and the study board is hoping for as many students as possible.

Recommendation:

The study board is asked to review the intake numbers for 2026.

Appendix:

- Intake report

Punkt 9: Study Environment activities fall 2026

Beslutning

The study board would like to know if there are any statistics on how many students show up to make sure it makes sense to have this many activities. Kristian will ask the SMT's or the SMT coordinators if there are any figures on attendance.

The Head of Studies will try to get a "Fagudvalg" established for Virksomhedsledelse. This would be to get more student perspectives and have more student activity.

Recommendation:

The study board is asked to make itself acquainted with the attached overview of activities that the study environment tutors are responsible for in the fall of 2026. The planned initiatives can be subject to change. More information on the specific events will be posted on the Moodle-groups of the relevant programmes and on ISEs Instagram, if there is a broader audience. Once the final dates are settled, the poster will be printed and posted in ISEs buildings.

Punkt 10: Any other business

Beslutning

Based on the lower cohort for BAL and VL students, the Head of Studies, in cooperation with the Study Board, will work on having some courses taught together across BAL and VL on the 2nd semester. Potentially Advanced organisation and Change. It is important that the students on VL and BAL get to know each other on their separate programmes before courses are potentially taught together.

The secretary informed that this is the last meeting before a new colleague, Louise Jes Nielsen, will take over the study board from September.

Maria Duclos Lindstrøm, as representative for the 120 ECTS cand.merc group, presented the current work being done in the working group for the MA-reform. The presentation was initial ideas based on the comments that Rector had in June.
