Punkt 11: Drop-out analysis

Dear Study Board Members,

I'd like to suggest that we open a discussion about attrition rates at NAB and NIB based on the two documents dealing with short and long term attrition rates, respectively. As the program develops, it's important to look closely at the factors that influence whether students stay and complete their studies.

We have some useful key figures that could guide this conversation, including:

- Attrition rates across several years, to see overall trends
- Differences between genders
- Variations by nationality (domestic vs. international students)
- The impact of commuting or transport time
- Admission priority and how it relates to retention

Looking at these numbers together could help us spot where students might be struggling and where the program is working well. From there, we can think about practical steps to support students better and strengthen retention.

I'd appreciate it if this topic could be added to the agenda for an upcoming meeting. I believe a shared discussion will give us valuable insights and help us plan improvements that benefit both current and future students.

Thank you for considering this. I look forward to the conversation.

Martin Niss, 14-11-2025

Punkt 12: Submit consultation response regarding omfangskrav

Dear Study Board Members,

Tilmelding og Eksamen has made a memo saying that assignments, including projects, will no longer be checked for whether they are within the limits of the study regulations.

The study board for Hum Bach has written a letter (unfortunately, it is in Danish) concerning this situation. I would like the study board to consider whether we would like to express that we agree with the Hum Bach study board.

Martin Niss, 17-11.2025
