Punkt 7: Input to S.W.O.T analysis about bachelor project project market and allocation

The study board has discussed the allocation for the bachelor project several times, and now the department's education committee (consisting of the vice-dean and heads of studies) has made a SWOT analysis based on the various options that have been discussed.

The study board is asked to qualify the analyses attached here - especially focusing on strengths, weaknesses, opportunities and threats for the students in the three models.

SWOT about bachelor project allocation.docx

Punkt 8: Discussion of why students don't show up for classes

The study board has previously asked why some students do not turn up for classes. This is both something that is written in the feedback forms from our evaluation process from the course coordinators and that the members of the study board have also brought up.

The study board is asked to come up with suggestions as to why the students do not show up?
What would it take for students to prioritise showing up for classes?

If the study board itself cannot provide suggestions on the above, please discuss how we gain knowledge about it and move forward in an attempt to meet the students' barriers to attending classes.
